EAE GROUP IN NUMBERS

Since 1973

EAE Group of Companies started its journey in the electrical sector in 1973 with the establishment of EAE Elektrik. Since its founding, EAE has grown rapidly, expanding its production and areas of operation by incorporating EAE Lighting in 1983, EAE Machinery in 1996, EAE Electrotechnics in 2004, and EAE Technology in 2009.

EAE carries out its production activities in accordance with ISO 9001 Quality Management, ISO 14001 Environmental Management, ISO 14064-1 Greenhouse Gas Management System, ISO 45001 Occupational Health and Safety Management, ISO 10002 Customer Satisfaction Management, ISO 50001 Energy Management System, and ISO 27001 Information Security Management System standards.

# E-LINE SMART SM-STD I
Free-Standing Wired Type (3m with Plug)

• It can be securely fixed with screws when needed in rectangular prism structure for desk usage or wall-mounted surface applications.
• In desktop or wall-mounted applications, it comes as a version with a 3-meter power cable attached to the socket block.
• Equipped with mains, UPS, sockets, and USB charging output accessories.
• The built-in on/off button allows controlling the power of connected devices with a single press.
• Products are delivered in nylon bags and cardboard box packaging.
• Prices include installation, internal wiring (applicable to energy sockets), and blast type plastic side covers. All cables are halogen free.

Technical Specifications and Order Codes
Standard Empty Product Table

EAE
ELEKTRİK
EXPLANATION

1. Assembled in 8 different sizes ranging from 6 modules to 20 modules, empty, as standard. You can also wire it yourself with the necessary number and type of socket assembly according to your needs.

2. The product is manufactured and sold as an unassembled empty case. As socket assembly and wiring, as well as electrical testing, are not conducted by us, our company will not be responsible for any malfunction in case of such issues.

3. "Halogen free" feature PA6 side panels, suitable for the body structure and equipped with knock-out holes for cable entries, are provided as standard with the product. Additionally, the product includes screw-type cable retaining clips inside the body and a grounding terminal mounted on the body.

4. In addition to the standard sizes listed, custom manufacturing in different sizes can be provided upon request and need. Please contact our company for further information.

5. The structure and dimensions are suitable for the assembly of modular type 45x45 mm or 22.5x45 mm mains and UPS power sockets, as well as telephone, data, USB, HDMI, and VGA multimedia sockets. However, it's important to note that the socket height and fitting details may vary and may not be compatible with all brands. Please contact our company before placing an order to discuss this matter.

E-LINE SMART

General Product Structure and Features

Equipped Office Socket Blocks

1. The body is made of aluminum material and painted with alternatives of Anodized or electrostatic powder coating system in smoke and black colors.

2. Side plastic covers are made of (PA6) material, providing compliance with "halogen-free" and meeting the 960°C hot wire (glow wire) test conditions according to IEC 60965 standard, classified as "V2" flame resistance class according to UL94 standard.

3. Standard free-standing products can be fixed to the table with appropriate feet already attached when necessary.

4. Standard free-standing products can be screwed into the table inside and/or underneath through the screw holes on the side covers when necessary.

5. Recessed type products' covers are opened and closed with a push-lock (push-open - push-close) system, and the covers can be opened up to a maximum of 90° to prevent breakage. The cable entry and exit points of the cover are brush structured, and the brushes are made of PA6 material. When any type of plug or adapter is plugged into the sockets, the covers can easily close. The product is designed to be a maximum of 2mm above the table surface when the cover is closed.

6. Standard products that can be fixed to the table are positioned at a certain angle for ease of use, and there is a movable cover plate on the back of the product that covers and protects the cable entry and exit points in a body-compliant manner.

7. The product contains terminal connection apparatus both inside and in a separate compartment, featuring screwless terminal blocks for each conductor with a push-in type connection. Additionally, this terminal apparatus is equipped with a cable compression clip to withstand pulling and tensile loads on the cables.

8. The connection of the power sockets mounted on the product is made with H07Z1-K type cable with a cross-section of 2.5 mm² or optionally 1.5 mm², and it is equipped with terminals capable of carrying at least 16A load for screwless push-in type connections, separately for UPS and Mains circuits.

9. The grounding contact screw and grounding terminal, fixed to the Aluminum body of the product, are connected with H07Z1-K type cable with a cross-section of 2.5 mm² to ensure body protection.

10. The socket mounting section is integrated with the body and designed to accommodate power sockets of any brand, as well as universal and modular type sockets, with dimensions of 45x45 mm (2 modules) for power sockets and 45x22.5 mm (1 module) for low-current and multimedia socket mounting.

11. The mains and UPS sockets are 250V AC, 16A, with a 45° angled design and a snap-in structure. The sockets used in the mains circuit are "white" in color and grounded according to the German standard, while the sockets used in the UPS circuit are "red" in color and grounded according to the French standard.

12. For data cable connections, spring-loaded and labeled "face plates" suitable for Cat-6 UTP keystone jack structure are used.

13. For telephone cable connections, spring-loaded and labeled "face plates" suitable for Cat-3 keystone jack structure are used.

14. The socket mounting section is also designed to accommodate various standard and modular USB chargers, USB adapters, VGA adapters, HDMI adapters, etc. (45x45 and/or 45x22.5 mm), and it can be used with products of any brand.

15. Between the strong and weak current sockets inside the product, as well as after the last socket, blind covers compatible with the body of 45x22.5 mm (1 module) size are used before the termination cover.

16. For cable outlets on the desk, flexible and "halogen-free" cable organizer and protective plastic spine channels are used.

Dem Zertifikat liegt unsere Prüf- und Zertifizierungsordnung zugrunde und es bestätigt die Konformität des Produktes mit den oben genannten Standards und Prüfgrundlagen. Zusätzliche Anforderungen in Ländern, in denen das Produkt in Verkehr gebracht werden soll, müssen zusätzlich betrachtet werden. Die Herstellung des zertifizierten Produktes wird überwacht.
This certificate is based on our Testing and Certification Regulation and states the conformity of the product with the standards and testing requirements as indicated above. Any additional requirements in countries where the product is going to be marketed have to be considered additionally. The manufacturing of the certified product is subject to surveillance.
