E-LINE TBS

Trolley Busbar Systems

- Bridge Cranes
- Monorail Systems
- Textile Cutting and Spreading Tables
- AS/RS Storage Systems
- Moving Ceiling and Door Systems
- Assembly and Test Lines

It consists of copper conductors and current collectors in the C-PVC body. The uninterrupted energy supply and movement of the system is provided by current collectors connected to the system mechanically.

The eliminates the possibilities such as accident, malfunction in energy distribution with suspended and reel cable in conventional systems. Conductors are enclosed in C-PVC housing and personnel safety is maximized.

There is no fixed connection between the conductor housings and the conductors and between the C-PVC housing and the sliding hangers, the necessary expansion opportunity is provided, therefore the expansion element is unrequired.

Cautions:

If it is used in external environments exposed to rain, it is recommended to protect it with a cover such as a canopy.

Note: Each sliding hanger should be mounted between 1,30m - 1,50m.

TBS Trolley Busbar

Description	Weight (gr/m)	Order Code
TB5 Trolley Busbar Housing	1250	2037290

The housing has a structure that can use maximum 5 conductors. There is safety system that prevents the current collector to be fixed inversely.

Continuous Copper Conductors

Electrolytic copper conductors can be applied without interruption at a maximum length of 150 m.

- **Number of Conductors:** 4 or 5 conductors
- **Colour:** Red.
- **Temperature range:** -40°C , +55°C.
- **Standard housing length:** 4 meters.
- **Protection:** Standard IP24, Gasket, IP44.
- **Non-Flammable Characteristics:** UL 94 V0
- Housing is made of C-PVC and plastic accessories are made of PA6 raw material.
- Conductors are protected against hand contact inside the insulating housing.
- There is a neutral line on the housing indicating the neutral conductor.

Standard 4 Meters

Model	Conductors Quantity-Current (A)	Weight (gr/m)	Conductor Cross Section (mm ²)	Order Code
TBS 044	4P - 40A	1700	4x11,20	3024465
TBS 064	4P - 63A	1750	4x12,80	3182880
TBS 074	4P - 75A	1900	4x16,00	3024466
TBS 104	4P - 105A	2200	4x24,00	3024467
TBS 134	4P - 130A	2450	4x32,00	3024468
TBS 045	5P - 40A	1800	5x11,20	3024461
TBS 065	5P - 63A	1850	5x12,80	3182877
TBS 075	5P - 75A	2050	5x16,00	3024462

TBS 135	5P - 130A	2750	5x32,00	3024464

Joint plastics are not included in the weight values.

Total weight of the joint plastics and bolts is 100 gr..

Radius Trolley Busbar

It has minimum 1.5m radius Trolley Busbar available in vertical axes.

- Radius Trolley Lines can be applied with maximum 4 conductors.
- We recommend to use housing pins at joint units of radius trolley lines.

TBS Feeder Units

Description	Weight (gr)	Order Code
TBS Feeder Units	1000	3024457
TBS Feeder Box	650	3179927

Type of the feeder box is selected by calculating the voltage drop and the location of the power supply that shall provide power to the system.

TBS Joint Unit

Description	Weight (gr)	Order Code
TBS Joint Unit	90	1003663

TB Housing Pin

- Two pieces should be used with each joint unit

Description	Weight (gr)	Order Code
TB Housing Pin	8	1001025

TBS End Closure

The end closure placed on the end of the busbar line prevents the exposure of the conductors, protects the system, and prevents the current collector from moving out of the housing.

Description	Weight (gr)	Order Code
TBS End Closure	450	3024419
TBS End Cover	25	1003109

TBS Line Feed Units - Continuous Type

Description	Weight (gr)	Order Code
TBS Line Feed Unit - Continuous Type	2350	3024458

Type of the feeding element is selected by calculating the voltage drop and the location of the power supply that shall provide power to the system.

TBS Line Feed Units - Jointed Type

Description	Weight (gr)	Order Code
TBS Line Feed Unit - Jointed Type	2450	3024472

Type of the feeding element is selected by calculating the voltage drop and the location of the power supply that shall provide power to the system.

TBS Repair Zone Unit

Description	Weight (gr)	Order Code
TBS Repair Zone Module	2550	3066696

Current supply shall be cut off when a machine working on the line shall be maintained or repaired. Repair zone module is used to create a currentless area on the busbar so that the other machines operating on the same line may continue to work.

TBS Current Collector Replacement Module

Description	Weight (gr)	Order Code
TBS Current Collector Replacement Module	1500	3024471

This unit is used to remove an existing current collector or to add extra trolleys. The unit is obtained by cutting a 50cm section from the PVC housing.

TB5 Current Collectors With Cable

Model	Brushes Number-Current (A)	Weight (gr)	Order Code
TB5	4P - 35A (Single)	1700	3024385
	4P - 70A (Double)	2950	3024386

	5P - 60A (Single)	2200	3203194
	5P - 120A (Double)	3850	3269559

TB5 Current Collectors With Clip

Model	Brushes Number-Current (A)	Weight (gr)	Order Code
TB5	4P - 35A (Single)	1350	3024388
	4P - 70A (Double)	2050	3024389
	4P - 105A (Triple)	3050	3024390
	5P - 35A (Single)	1350	3024379
	5P - 70A (Double)	2250	3024380
	5P - 105A (Triple)	3200	3024381

*Produced with standard M40 cable gland and 4mm² clip.

Current collector with clips allow the customers to perform cabling as they desire with the clips they include.

Current collector are the moving elements of the trolley busbar systems. Current collector brushes rub against the conductors and draw continuous current while they move through the busbar line. They adapt to shaky and vibrant conditions thanks to the moving brushes. As current collecting and transfer systems are included in the C-PVC housing, they are protected against human contact.

TB5 Current Collector With Fuse Box

Model	Brushes Number-Current (A)	Weight (gr)	Order Code
TB5 (Kare)	4P - 35A (Square Brush)	1600	3024382
	5P - 35A (Square Brush)	1650	3024373
TB5 (Yuvarlak)	4P - 16A (Wheel Brush)	1650	3182882
	5P - 16A (Wheel Brush)	1700	3182883

Fuse boxed with both staff and current receiving area carts current machine's safety can be raised to a higher level. In addition, when it is desired to cut the power of one of the machines on a line, the current is cut off through the fuse, other machines on the line can continue to operate.

Current collector with Wheel Brush simplify the movement of the current collectors inside the busbar by reducing the time at the installation tables when movement is provided by the personnel.

TB5 Current collector models operating speed is max. 100m/min.

TBS

Voltage Drop

The voltage drop in the busbar lines shall be inspected as per the busbar type selected according to the total current calculated based on the ambient temperature and operating period of the system. Maximum acceptable value for voltage drop is 3%.

For Direct Current

$$\Delta U = 2 \cdot L_t \cdot I_G \cdot R$$

ΔU = Voltage Drop [V]

For Mono-Phase Alternative Current

$$\Delta U = 2 \cdot L_t \cdot I_G \cdot Z$$

I_G = Total current [A]

R = Resistance of the busbar [Ω /m]

For Three-Phase Alternative Current

$$\Delta U = \sqrt{3} \cdot L_t \cdot I_G \cdot Z$$

Z = Impedance of the busbar [Ω /m]

L_t = Calculated Hole Length [m]

Note : Calculation of the current drawn during first start in various motor types;

I_A = Total current drawn in the first start of the motors [A]

For the starting current; Three-phase asynchronous drive in direct start

Slip ring rotor motor

Frequency converter

I_A = I_G x calculated as 5 to 6

I_A = I_G x calculated as 2 to 3

I_A = I_G x 1,20 to 1,50 calculated between.

Calculation Of Feeding Points

When we take L_t as the length of the line, feeding points may be selected as shown in the diagrams below to keep the L voltage drop at minimum and it may be used as the hole length for the calculation of L_t voltage drop.

1 feeding point from the start, $L_t = L$

1 feeding point from the center, $L_t = L/2$

2 feeding points from the start points, $L_t = L/4$

2 feeding points, $L_t = L/6$

3 feeding points, $L_t = L/10$

4 feeding points, $L_t = L/14$

E-LINE TBS

Installation Manual

TBS - Installation Of Joint Unit

1
The joint point is covered using a self-adhesive EPDM gasket.

2
Engage the joint unit to the bottom of the busbar and close it.

3
Close the joint cover and screw it.

TBS - Feeder Unit

1
Conductors are bend 90° and pushed into the housing.

2
Housing and screw them to the feeding module.

3
Close the module cover and screw it.

TBS

TBS - Line Feed Unit - 2 (Jointed Type)

1
Bend conductors for 90°, and push them inside the housing.

2
Put conductors back-to-back and join them with clips. Connect the feeding cables to the clips.

3
Close the module cover and screw it.

E-LINE TBS

Installation Manual

TBS - Line Feed Unit - 1 (Continuous Type)

1 Put the conductors through the clips and screw them.

2 Connect the feeding cables to the clips with nuts.

3 Close the module cover and screw it.

TBS - End Closure

1 Cut the coppers at the end of the line by leaving a extra length of 15 cm.

2 After placing the current collector to the system, place the End Closure so that it shall house the coppers.

3 Install it on the system as you do while installing the extension.

TBS - Conductor Mounting Tool

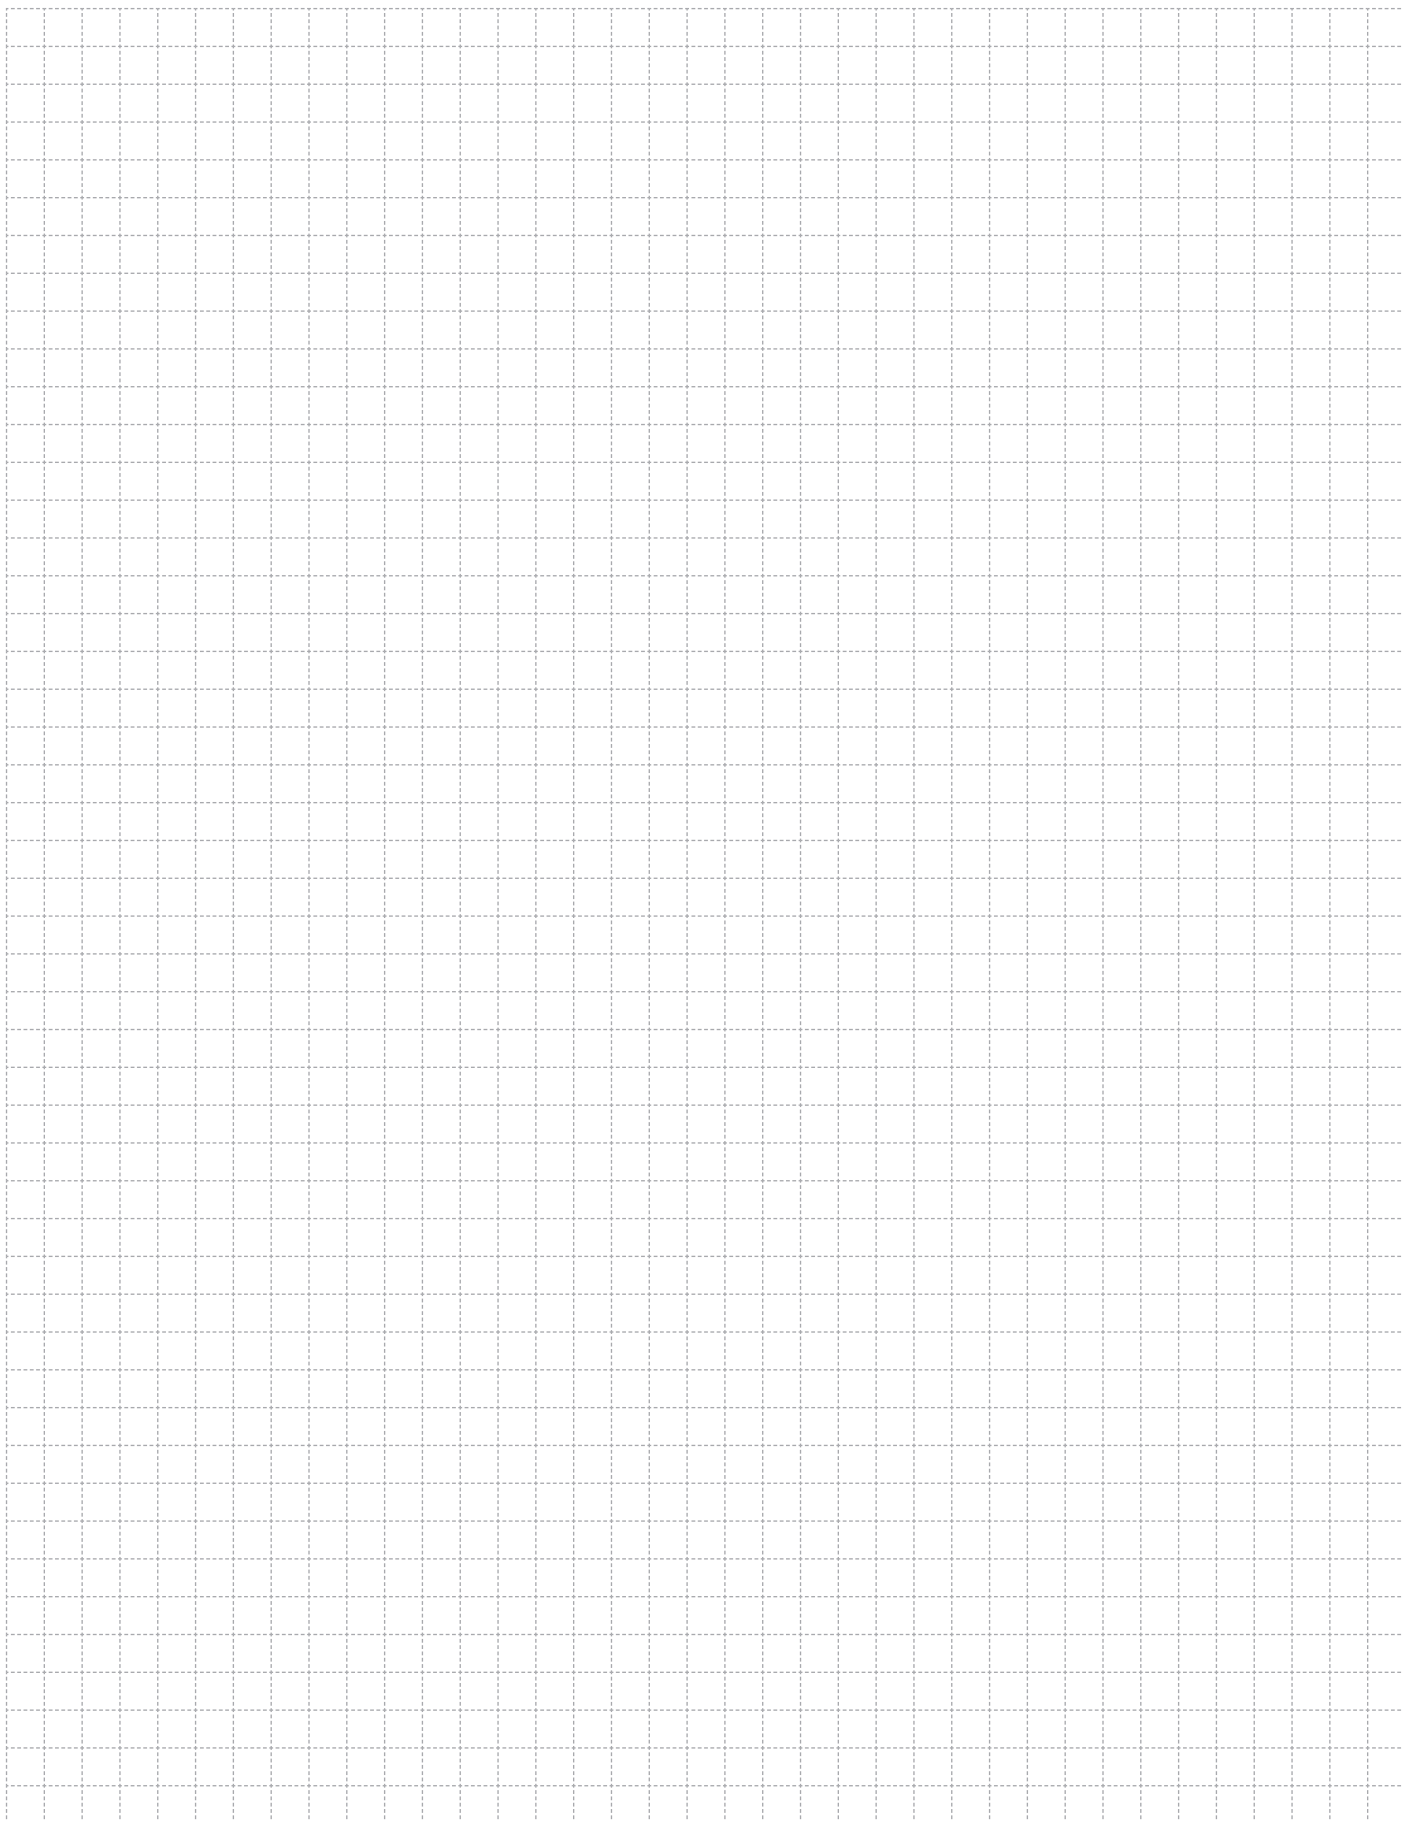

1 Screw the conductor to the conductor mounting tool.

Drive the conductor mounting tool along the line.

Ensure that the conductor is seated.

A large rectangular area filled with a fine grid of dashed lines, intended for taking notes or drawing diagrams.

SUSTAINABLE FUTURE

Sustainability Management at EAE Elektrik

As part of our goal to support sustainable development and green transformation, measuring, evaluating, and managing all economic, environmental, and social impacts resulting from our sustainability practices is a key governance priority for EAE Elektrik. We act with great care in analyzing, monitoring, and managing the economic, environmental, and social impacts and risks that arise throughout our value chain in both our national and global operations.
